Call Center News

In 2017 we added DeKalb, LaSalle, and Warren counties to our 2-1-1 roster. We now serve 40 counties in Illinois. We continued development of disaster protocols for counties served by 2-1-1.

Jennifer Nettleton, our program manager for 211/Crisis Services, moved with her husband to San Diego. She worked for PATH for over 15 years. She will be missed.

As a result, we named Susan Williams as our Call Center Operations Program Manager. Susan started at the agency in 1986 and has served as the Database Manager.

Our largest challenge in 2017 was pursuing technology and the funding for such

PATH, Inc. **Annual Report** 2017

OUR MISSION IS Providing Access To Help that improves and saves lives

FROM THE DIRECTOR

Maintaining quality services with fiscal responsibility was the focus for 2017. Chefs for PATH, our annual fundraiser. was a success and we added a 5K run in October connecting to routes by the new Destihl Brewery.

We were involved in several community endeavors including the Pay for Success project working towards reducing chronic conditions that keep people experiencing homelessness in a downward spiral.

Our 3 programs: 211, Adult Protective Services, and Homeless Services continue to strengthen our community.

Vision in 2017

PATH began work on seeking a new phone system that moves us towards the future of telecommunications. No longer do you see corded phones - the pro-

liferation of cell phones has changed the way people seek information and help.

The use of the Internet, chat, and text services pose challenges.

Our first step forward is to bring our call center up-to-date. We investigated a number of providers of "cloud" services and chose InContact, one of the largest provider of cloud services and a service that United Way Worldwide has made affordable. The results of the transition should be completed in April 2018.

NEWS FROM HOMELESS SFRVICES

PATH was awarded a grant through the Illinois Department of Human Services Emergency Services Grant to provide Rapid Rehousing Services. The program works with individuals and families who are in homeless shelters or in need of funds to continue current housing. The underlying philosophy focuses on the human impact of living in shelters and the cost of such shelter. The program starts in late spring.

This winter had more people experiencing homelessness than ever before. The national rate of homelessness increased for 2016. This surge in numbers requires diligence in our outreach and Rapid Rehousing Programs in 2018.

We have 2 grants from HUD for providing services. Our numbers for 2017:

Core Grant 567 people served Supplemental Services Grant 417 people served

We are the lead entity for the 11-county Central Illinois Continuum of Care. This association of providers of homeless services tackled veteran homelessness and met with success in 2017. The CICOC was able to petition HUD to be recognized as having ended veteran homelessness.

Coordinated Entry for People Experiencing Homelessness

What is coordinated entry?

The Coordinated Entry System (CES) is referred to as the "match.com" of homeless services. CES streamlines the process of finding housing for those who are chronically homeless with the goal of housing the most vulnerable people first.

Per the U.S. Department of Housing and Urban Development's (HUD) Continuum of Care (CoC) Program interim rule, each CoC is required to implement a coordinated entry system that covers the geographic area of their CoC.

PATH is the lead entity for the Central Illinois Continuum of Care which consists of 11 coun-

What is a Continuum of

The concept was introduced by HUD who funds communities that work together in meeting the needs of people without housing.

How Will Coordinated Entry Work?

There will be hubs located in McLean, Vermilion, and Kankakee counties. After-hours needs will be handled through 2-1-1. The intake focuses first on prevention/diversion, then intake and housing assessment, then housing placement.
